## **DETAILED ACTION**

### ***Response to Amendment***

1. The Amendment included changes to the Specification, however, at the top of that Amendment applicant refers to Application Serial No. 10/038,792. Since the Amendment does appear to match the instant Applicant, the Examiner will assume the application number was a typo and thus go ahead and consider the amendment. However, to avoid future confusion when this case goes to issue, please submit the amendment again with the proper Serial Number referenced at the top.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-8, drawn to laminate cartridge, classified in class 156, subclass 540.
  - II. Claims 11-19, drawn to overcoat application apparatus, classified in class 156, subclass 443.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the core having one or more teeth for engaging the slot is not needed to impart patentability to the combination claim. The subcombination has

Art Unit: 1734

separate utility such as being used in a device which simply requires a laminate feeder or being used in a labeling system rather than a laminate overcoat system.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sue A. Purvis whose telephone number is (571) 272-1236. The examiner can normally be reached on Monday through Friday 9am to 6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rick Crispino can be reached on (571) 272-1226. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
